

ROTOBEC

**WASTE
ATTACHMENTS**

A large pile of wood chips and mulch under a clear blue sky. The wood chips are light brown and vary in size, creating a textured surface. The sky is a clear, bright blue. The image is split vertically, with the left side being a darker, more shadowed area and the right side being a brighter, more sunlit area.

TRANSFORMING INDUSTRY STANDARDS

Rotobec has proven itself again in the waste sector through decades of innovation and knowledge to bring you world-class quality. Our innovative designs are built for reliability and durability, which is how we have raised the bar.

We never take anything for granted, that is why every component of our products are designed and manufactured in our production facilities in Sainte-Justine, Quebec (Canada) and in New Hampshire (USA), to bring you the highest quality. The most advanced technologies are used throughout the process and the result is simply the best material equipment available out there.

Unbeatable quality and nothing less. This is the promise Rotobec has been delivering throughout the years wherever you are in the world. We have worked hard for you. This is why today Rotobec products are globally recognized and trusted, making us the world leader in the industry.

We are Rotobec.

**ELEVATE

**NO TIME
TO WASTE.**

A yellow excavator with a grapple attachment is shown working in a large pile of industrial waste, including cardboard boxes and plastic bags, inside a warehouse. The excavator's arm is extended, and its grapple is positioned over the waste. The scene is illuminated by bright overhead lights, creating a high-contrast environment. The background shows the corrugated metal walls of the warehouse.

KEEPING THE WORLD CLEAN

Working with trash day in and day out can be a challenge. We know it is not an easy task. Harsh weather conditions, economic fluctuations, crisis, natural disasters; whatever is going on in the world trash needs to be picked up with a trustworthy machine. Who wants to repair a grapple working with trash? Not us! That's why we have built the most reliable and up-to-date waste attachments so your operations can run smoothly while keeping cities, and your hands, clean.

Want to know our secret sauce to building the most reliable attachments?

Our one and only continuous 360° rotators and our famous in-house cylinders! Rotobec continues pushing the boundaries of innovation in rotator and cylinder design.

We are well-known for our innovation and development of the most advanced 360° rotators. Our rotators are without a doubt the longest lasting ever made. They offer cost-effective maintenance due to easily accessible greasing points, a durable motor, and a fully supported pinion gear allowing them to go further and protect your investment. All of our dangle style rotators are fully sealed, allowing them to be fully submerged in up to 15 feet (5 meters) of water with the standard 360° rotator. We are committed to delivering the most reliable rotators on the market, no matter where you are in the world. Why settle for anything but the best?

THE FINEST DESIGN FOR SUPERIOR PERFORMANCE

There is no place for the weak in waste handling! The threat of damaged cylinders is a common and costly problem that can quickly bring your entire operation to a grinding halt. In order to protect your most precious asset, we have designed a cylinder that has revolutionized the waste industry. Rotobec provides you with a cylinder that is better protected and more durable than any other option on the market. Want less downtime and less damaged cylinders? Try our famous cylinders for yourself. You will never look back.

The Rotobec waste attachments are up for anything. Each configuration is available with either a dangle style rotator or one of Rotobec's incredible RGP positioned rotators, except for the contractor grapple. The diversity of the Rotobec line of trash attachments is simply unmatched by any other type of grapple available. Backed by Rotobec's industry leading, 18-month/3,000-hour warranty and our world-class service, they are quite simply the world's greatest tools for your needs.

RPA Trash: The RPA Trash Grapple is used in waste material handling applications. The extra wide jaw enables operators to grab large loads while the holes allow small debris to fall through.

RPA Compaction: The Waste Compaction RPA configuration can be used as a bucket, it is commonly used in waste transfer stations for compacting trash and get your truck to proper weight.

Sorting/Demolition: THE ULTIMATE WASTE MOVING TOOL. The Rotobec Waste Grapple is used in waste material handling applications for sorting and demolition, including wood waste, as well as waste transfer stations. The extra wide jaw and elongated head structure enable operators to grab incredibly large loads, while the holes allow small debris to fall through. Each configuration is available with either a dangle style rotator or one of Rotobec's incredible positioned rotators featuring bolt-on lugging.

Contractor Grapple: VERSATILITY EXPERT. Rotobec Contractor Grapples are the most versatile grapple around. Available in multiple jaw configurations, there is a Contractor Grapple for your application, whether it is in forestry, recycling, landscaping, construction, demolition or general contracting. Its jaws feature a box-style structure which provides the maximum level of strength and durability. They are available with a stiff arm, lugging, and an optional tool cylinder kit.

SORTING AND TRANSFER CENTERS' ATTACHMENTS

STORM CLEAN-UP AND ROADSIDE TRASH PICKUP ATTACHMENTS

Waste Collection and Multi-Purpose Grapples: PERFORMANCE. Rotobec's line of grapples includes our Multi-Purpose Grapple and the very popular Waste Collection Grapple. These lightweight attachments are ideal on self-loaders and can be used to pick up every material imaginable. They are commonly used on municipal vehicles for waste pickup and storm clean up. They are available with both high and low pressure cylinders and in a variety of sizes, allowing for installation on every type of loader or excavator. If you are in need of a do-everything attachment, there is a Rotobec small trash grapple ready for the challenge.

Mini PC Rake and Bucket: LITTLE GIANTS. Rotobec Mini Power Attachments may be small, but you wouldn't know it when you're behind the controls. These little giants feature many of the same innovations that have made our full size Rotobec Power Attachments so successful. They can be easily fitted to a variety of mini-excavators and used in several different applications. The Rotobec Mini Power Attachments are available in a Rake as well as a Bucket configuration and come with either a 12-volt or a 24-volt selector valve. Make no mistake about it, these powerful little grapples possess the same toughness and durability you get from everything Rotobec manufactures.

ROTOBEC

- At Rotobec, we are not (and will never be) afraid to say it out loud: **we are the best!**

The reason is simple. Just like you, we have earned this position. And just like you, we work hard every single day to keep it. From dawn to dusk. Just like you, we know that the best things in life are tough earned.

That's why we never take anything for granted; a reputation, the number of fans on Facebook, a safe place in the industry, the trust of the dealers, the satisfaction of the customers, the comfort of the team, the perfection of a piece of equipment. It's about giving it our all and raising the bar. Doing better, pushing harder, going further.

That is how we achieve to build the most trustworthy equipment and relationships in the business. Why accept less? **You deserve what's best.** The industry deserves what's best. The world deserves what's best.

So together, let's aim higher. If it doesn't exist, we'll create it. We can do better, let's do it. When the horizon gets tough, we keep going.

We are Rotobec!
